About Us

Based in Sheffield, Woods and Green was founded out of a genuine passion and deep connection to the game. Our creative director and founder combined a love for golf with expertise in design and industry to bring this vision to life.

Our approach revolves around user-centred design—a process that prioritises you, the customer, at every stage. By understanding your club, its members, its history, and its aspirations, we craft products that reflect and enhance your identity. We use cutting-edge design and production techniques to deliver bespoke solutions tailored for both on and off the course.

Our Materials

Iroko

Iroko is a durable West African hardwood often regarded as a sustainable alternative to teak. Aesthetically, it ranges from golden yellow to rich medium brown, darkening beautifully with age, and features a fairly coarse, interlocked grain that gives it a distinctive, natural look. In terms of durability, iroko is highly resistant to decay, moisture, and insect attack, making it ideal for both indoor and outdoor use, including decking, furniture, joinery, and boat building.

Its properties include good dimensional stability, medium-to-high density, and moderate natural oil content. Iroko machines and finishes well, and due to its high density, is a brilliant option for laser engraving.

Sapele

Sapele is a rich, reddish-brown hardwood native to tropical Africa, prized for its striking interlocked grain and deep, lustrous sheen that often resembles mahogany. Aesthetically, it features a warm, golden-to-dark reddish tone that darkens beautifully over time, with ribbon-like figuring or a shimmering "chatoyance" effect when quarter sawn.

In terms of durability, Sapele is a dense and stable wood with good resistance to rot, wear, and insect attack, making it suitable for both interior and exterior applications such as furniture, flooring and cabinetry. Its properties include a medium-to-high hardness, fine texture, and excellent finishing qualities — it machines, glues, and polishes well, though care is needed to avoid tear-out due to its interlocked grain.

Having two hardwood options gives you the choice to create a differing tone across your course which may be a new look or something that fits into an existing aesthetic. We aim to excel the natural tones of the woods we use but there are multiple options on changing tones and colouring on the following page.

Bespoke options

Through our bespoke projects we offer various other tropical hardwood and native hardwood including English Oak, English Ash, Sweet Chestnut, Sycamore and many more.

Protection

Our ethos when it comes to wood protection is to let the wood breathe. This means we look to avoid film forming protections like varnish and polyurethane, as they will over time flake and then create maintenance problems in terms of restoring or its continued use. Our two options differ in application and look, but both allow the wood to breathe.

Over time, this requires the products to be re-coated or touched up, but will in turn allow for a longer lasting product.

Osmo Oil - Sheen Finish

CLEAR PROTECTION FOR VERTICAL STRUCTURES

- Highly water and dirt resistant
- Environmentally friendly wood finish
- 410 is safe for humans, plants and animals when dry
- Clear and transparent colour finishes available
- Microporous, penetrating finish which does not crack, peel or flake
- No sanding necessary when topping up coating
- Delays natural greying by 12 times in comparison to untreated wood

Looking for a product with Extra active film protection? View UV-Protection Oil Extra Duration depends on wood type, weather conditions, and compliance with our preparation, application, and maintenance guidelines. It is advised that the solution be re-applied after least 2 years. This may vary depending on climate, location and use.

Duro Grit - Matte Finish

DuroGrit is ideal for outdoor wood projects where UV protection and durability are crucial. The product is available in 14 colours and is suitable for terraces, garden furniture, claddings, etc. Thanks to the 0% VOC's it's also ecological and safe to use.

- Patented FibreGrit Technology
- Proven 1-layer technology
- Tomorrow's UV resistance
- Tough mechanical protection
- For all exterior wood

Duration depends on wood type, weather conditions, and compliance with our preparation, application, and maintenance guidelines. It is advised that the solution be re-applied after least 2 years. This may vary depending on climate, location and use.

Maintenance

Please speak with our team to discuss your maintenance options. Woods & Green offers a Maintenance Pack, which can be purchased and used for in-house product upkeep, and a Maintenance Package, which includes annual or bi-annual site visits to maintain and restore your course furniture.

The package details may vary depending on product volume and club location.

Branding Options

Below are various options for presenting branding, logos and information. We strongly believe in a point of difference for every club and we will work closely with you to find your style.

Laser Engraving

We use the highest quality laser machines to engrave logos and detail into our hardwoods. The density of the hardwoods allows for a clean and crisp finish.

The engraving also creates a natural embossed look which marries well with the natural feel and aesthetic of the timber product itself.

Colour Fill

We use the highest quality laser machines to engrave logos and detail into our hardwood's. We can go over the engraving with multiple a passes to increase depth and then colour fill the engraving in various colours.
We use sign-writer enamel-based paint for colour filling which is highly durable for outdoor conditions.

Etched Zinc

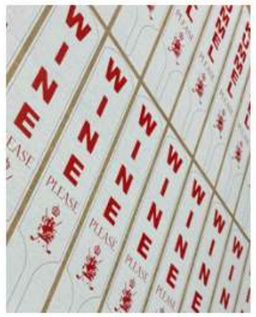
Etched Zinc is a highly corrosion resistant material that is UV-and-temperature tolerant, with a long lifespan and many variants in design and customisable options.

The detailing is crisp with a professional finish and custom colour infills available.

Cast Bronze

Our cast bronze options are virtually indestructible with a corrosion-resistant, century-grade lifespan. The bronze carries a classic and elegant look that brings dimensional depth to the piece.

The plaques can be mounted or inlaid and also have custom colour infill options.



Direct Print

Our direct print option is a full colour UV print directly to the wood surface. The full colour print brings vibrancy and carries the brand consistency throughout the club and its products. Only using ink on the wood makes for a more sustainable option but also carries a natural charm as the wood grain can be visible through the print.

Laser Cut Metal

Laser cut metal plaques are built for outdoor use. We use the highest grade stainless steel and powder coating techniques to create low maintenance professional pieces. This option creates a sleek, contemporary look with depth through negative space.

Engraved Laminate

Engraved laminate is a two colour plastic laminate with a surface colour and a base colour. We use a laser machine to engrave through the top colour to reveal the detail with the contrasting base colour. This is a great option for sleek and minimalist logos and has many options in terms of colour combinations.

Vinyl-Decal

Vinyl-decal stickers give more flexibility in colouring and complexity in design. They have outdoor grade durability and carry great temperature and moisture resistance. The full colour vinyl brings vibrancy and carries the brand consistency throughout the club and its products.

Tee Markers.

Tee Markers.

Block

BLOCK	Our Block tee markers are 94mmx 94mmx94mm with a 18mm x2mm deep colour channel and stainless steel spike. Optional branding is presented by laser engraving the top surface.
WGTM001	Block marker in iroko
WGTM002	Block marker in sapele

Point

POINT	Our Point tee markers are 120mm x 70mm x70mm with a 18mm x2mm deep colour channel and stainless steel spike. Optional branding is presented by laser engraving on a face surface.
WGTM003	Point marker in iroko
WGTM004	Point marker in sapele

Sphere

SPHERE	Our Sphere tee markers are 70mm diameter with a 18mm x2mm deep colour channel and stainless steel spike. Optional branding is presented by laser engraving on a flat angled surface.
WGTM005	Sphere marker in iroko
WGTM006	Sphere marker in sapele

Angle Round

ANGLE ROUND	Our Angle Round tee markers are 70mm diameter with a stainless steel spike. Optional branding is presented by laser engraving into a coloured laminate disc on a flat angled surface.
WGTM007	Angled marker in iroko at 150mm height
WGTM008	Angled marker in sapele at 150mm height
WGTM009	Angled marker in iroko at 90 mm height
WGTM010	Angled marker in sapele at 90 mm height

Silhouette

SILHOUETTE	Our Silhouette tee markers are designed with the clubs logo and branding in mind. Full tee colour or part painting can be applied. Powder coating is chosen for its industrial strength.
WGTM011	5mm thick stainless steel silhouette powder coated in chosen colour.

Secret Valley
Case Study

Secret Valley Golf Club, nestled near Petra tou Romiou — the legendary birthplace of Aphrodite — is one of Cyprus's most picturesque golfing destinations. Surrounded by stunning rock formations, lush valleys and spectacular views of the Mediterranean Sea, the course offers a dramatic yet tranquil setting.

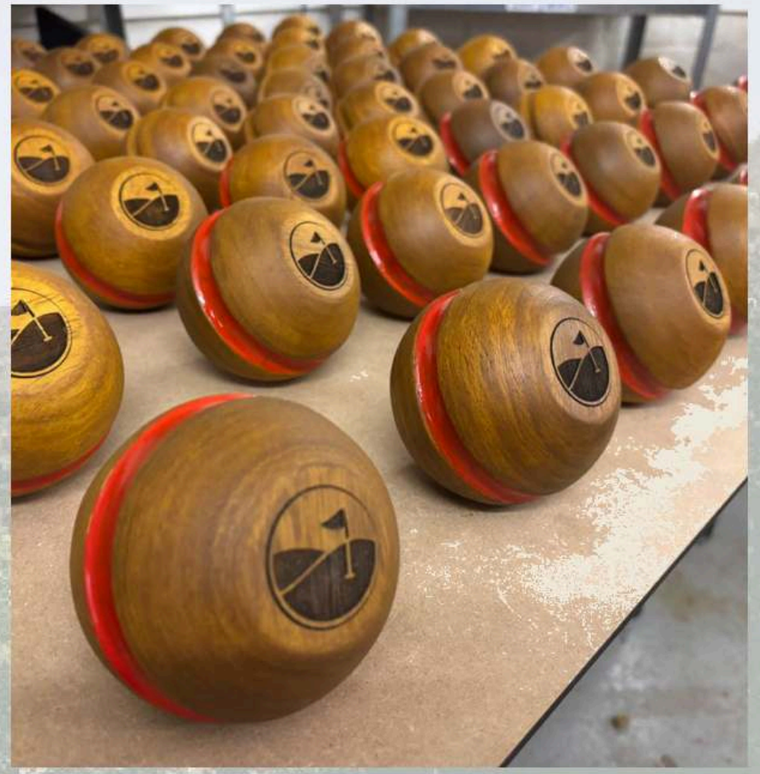
Known for its challenging layout, fast greens, and friendly atmosphere, Secret Valley combines natural beauty with excellent facilities, making it a favourite for both local players and visiting golfers.

Mark Cole

'We've just taken delivery of our new hand-crafted iroko tee markers, and I couldn't be happier with how they've turned out. They're now out on the course and look fantastic, elevating the look of each tee box.

A massive thanks to Liam Hall and the team Woods & Green for the great work. The finish, shape, and overall feel of the markers are top quality, exactly what we were after. I must say they are probably the best markers I have seen on any golf course.'

Mark Cole - Golf Course Superintendent



Course Markers.

Hole Posts.

Monolith - Engraved

MONOLITH ENGRAVED	Our Monolith Posts are 700mmx 44mm x170mm with a colour band and laser engraved hole detail with rustic worn edging.
WGTP001	Post in iroko
WGTP002	Post in sapele

Monolith - Zinc

MONOLITH ZINC	Our Monolith Posts are 700mmx 44mm x170mm with a colour band and etched zinc detail plaque.
WGTP003	Post in iroko
WGTP004	Post in sapele

Monolith - Print

MONOLITH PRINT	Our Monolith Posts are 700mmx 44mm x170mm with a colour band and primaDURA printed panel.
WGTP005	Post in iroko
WGTP006	Post in sapele

Block Tee Post

BLOCK	Our Block posts are 94mm x 94mm x 600mm. The detail is engraved on the the face edge with a colour band to the top.
WGTP007	Post in iroko
WGTP008	Post in sapele

Mini

MINI	Our Mini posts are 120mm x 70mm x 330mm.
WGTP009	Post in iroko engraved
WGTP010	Post in sapele engraved
WGTP011	Post in iroko with etched zinc
WGTP012	Post in sapele with etched zinc

Ground Sockets

GROUND SOCKET	Our ground sockets are made from stainless steel and are a two part system which comprises of a square tube and plate which is fixed to the post and a sleeve that is permanently fixed in the ground of which this slides into.
WGTP013	Monolith ground socket
WGTP014	Block post ground socket
WGTP015	Mini ground socket

Lincoln Golf Club
Case Study

Lincoln Golf Club, often known as Torksey, is a historic course located just outside the city of Lincoln. Established in 1894, it is a classic heathland layout that has hosted many prestigious amateur events over the years.

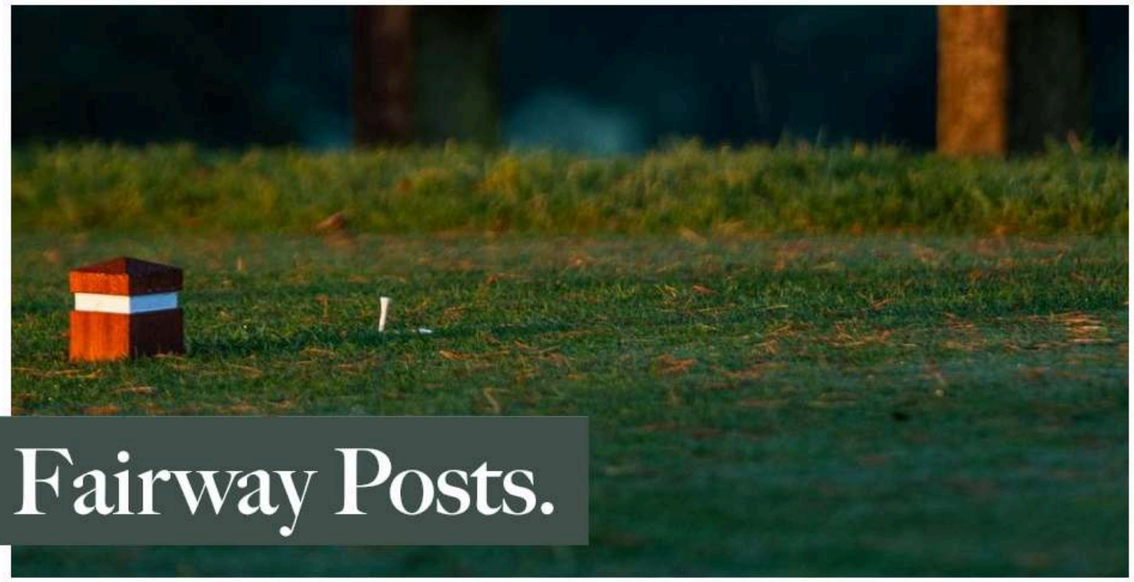
The course is renowned for its firm fairways, natural bunkering, and strategic design that challenges golfers of all levels. With its welcoming clubhouse and rich heritage, Lincoln Golf Club offers a traditional yet enjoyable golfing experience in a beautiful countryside setting.

Louis Booth

'We've been working with the team at Woods and Greens for the last 3/4 years for all of our signage-based products. Liam and the team are a pleasure to work with and never fail to bring our signage ideas to life.

These have made a notable difference around the Golf Club in keeping members informed and also in elevating the on-course experience with the quality of the craftsmanship. We couldn't recommend the team at Woods and Greens highly enough and look forward to our next delivery on recent projects/ideas for the 2026 season!'

Louis Booth - General Manager



Fairway Posts.

Square

SQUARE	The Square Posts are 70mm x 70mm x 600mm. Both the club logo and the yardage is engraved onto one face edge.

Tone Options

We offer a wide range of tone options for your Cast Stone.

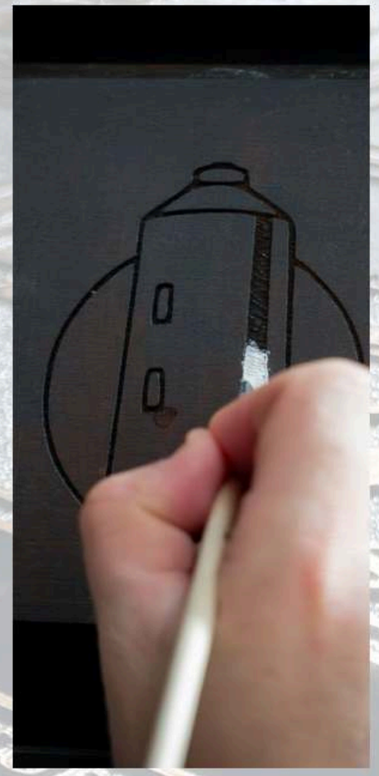
Please insure you speak to our team when you're deciding on tone options as it may include a surcharge.

Portland	Ivory	Bathstone	Cotswold	Yorkstone	Natural Gray	Charcoal	Terracotta

Burnham and Berrow
Case Study

Burnham & Berrow Golf Club, located on the scenic Somerset coast in southwest England, is one of the country's finest links courses. Established in 1891, it features a championship course renowned for its challenging dunes, fast-running fairways, and stunning views of the Bristol Channel.

The course has hosted numerous prestigious amateur tournaments and is celebrated for its classic design that tests both strategy and shot-making. Combining rich history with natural beauty, Burnham & Berrow offers a true traditional links experience for golfers of all levels.



Liam Pigden

"I'm continually impressed by the outstanding quality of the products. It's clear that a lot of care and attention goes into every stage of the design and creation process, and the team is always a pleasure to work with — professional, responsive, and genuinely committed to great results."

Liam Pigden - Course Manager

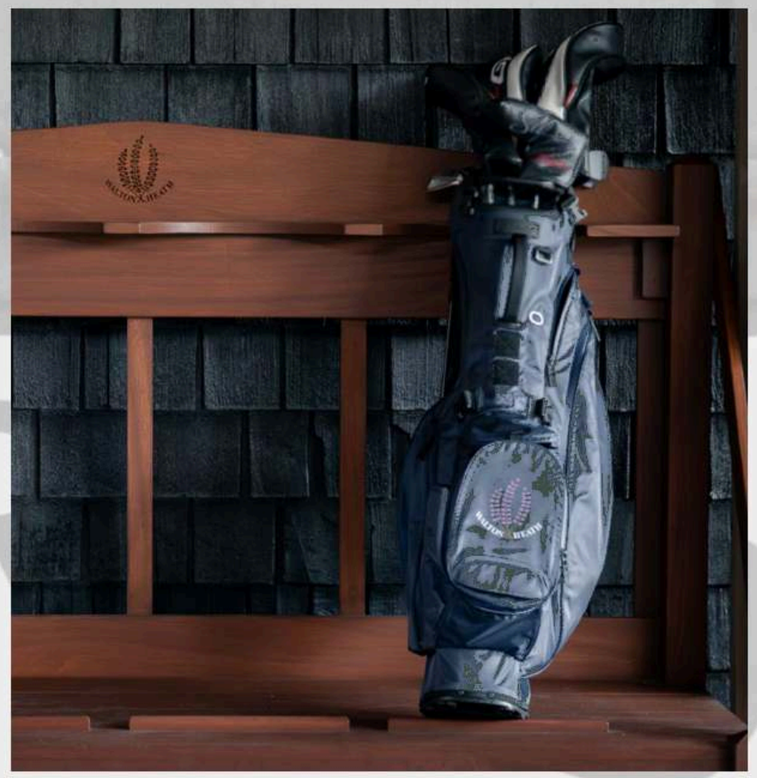
Walton Heath
Case Study

Walton Heath Golf Club, located in Surrey, is one of England's most celebrated golfing venues. Established in 1903, it boasts two world-class heathland courses, the Old and the New, both renowned for their fast-running fairways, heather-lined rough, and strategic challenges.

The club has a rich championship pedigree, having hosted numerous prestigious events, including the Ryder Cup and the European Open. With its historic clubhouse and exceptional golfing heritage, Walton Heath remains a cornerstone of traditional English golf.



Josh Moses

We would like to thank Woods & Green, we enjoyed working with you on these projects. The A-boards are great and are exactly what we wanted.
We've had so many compliments, thank you so much.
